- Soft light upgrade  
Compared with Ocean II, the luminous area is increased by **20%**, which is softer and brighter, perfectly solving the brightness requirements and reducing glare.
- Industry first  
Backlight uniformity (cd/m<sup>2</sup>) is introduced into lamps for the first time.  
Hermes uniformity is **≥80%**, far exceeding the 60% of ordinary lamps.
- Precise control  
**90°** adjustable beam angle, flexible control of light direction, perfectly solving the problem of uneven light.
- Perfect lighting  
The unique structural design ensures no shadows and evenly distributed brightness, providing you with a seamless and perfect lighting experience
- Optical pioneer  
Precision prism board technology accurately controls light, and each beam of light is carefully crafted to present a perfect lighting experience.
